Created by u/g8trtim

An ultralight, minimalist "trail wallet" perfectly sized for securely holding cash, credit cards, ID, and any other small personal items. Made from ultralight fabrics, this travel wallet weights only a few grams and is weather resistant. Consider adding a webbing loop or key clip to this functional pouch for attaching inside your backpack.

Preparations

Print the pattern on US Letter (8.5 x 11) paper. It is very important to print at 1:1 scale. Where applicable, the pattern will print on multiple pages. Arrange the pages matching up the numbers and letters (e.g. 1B to 1B). Cut or fold one of sides and match the edge to its corresponding side. Then, tape together and cut out the pattern shapes.

Trace the pattern pieces from the pattern sheet onto the wrong side of the fabric.

Standard seam allowance is 3/8 inches throughout unless otherwise stated.

Assembly Instructions

1. Prepare fabric panel per Preparations and mark fold lines on wrong side.
2. Wrong sides facing out, attach zipper to panel at both ends. Seam allowance 0.3 inches. Flip right sides out and top stitch along teeth to finish. If necessary, open zipper fully to top stitch both sides.
3. Fold panel and lightly press to form Front, Back, and Top. Pin within seam allowance as necessary.
4. Sew one side closed with 3/8" seam allowance. Repeat on other side. Reinforce zipper ends.
OPTIONAL: add webbing loop and/or key clip at this step.
5. Trim seam allowance and flip right side out. Press firm along top, back, and front fold lines.
6. Top stitch along side, stop at zipper stitch line. Top stitching keeps wallet flat and captures seam allowance inside to prevent fraying. Repeat on other side.

Materials

- One zipper, YKK #3
- One fabric panel
- Optional: Pull cord, webbing loop, or key clip

Fabric recommendations:
PU Coated Nylon or Silnylon
X-PAC VX07
Dyneema Composite Fabric

Symbols

Fold Line

A broken line indicates the fold edge of a double layer of fabric. A broken line pattern edge must be placed on a fold and not cut.

Seam Marks

Shown on curved or long seams, these small lines perpendicular to the cutting line indicate edges to be matched. Align the seam marks to one another.

Lengthening

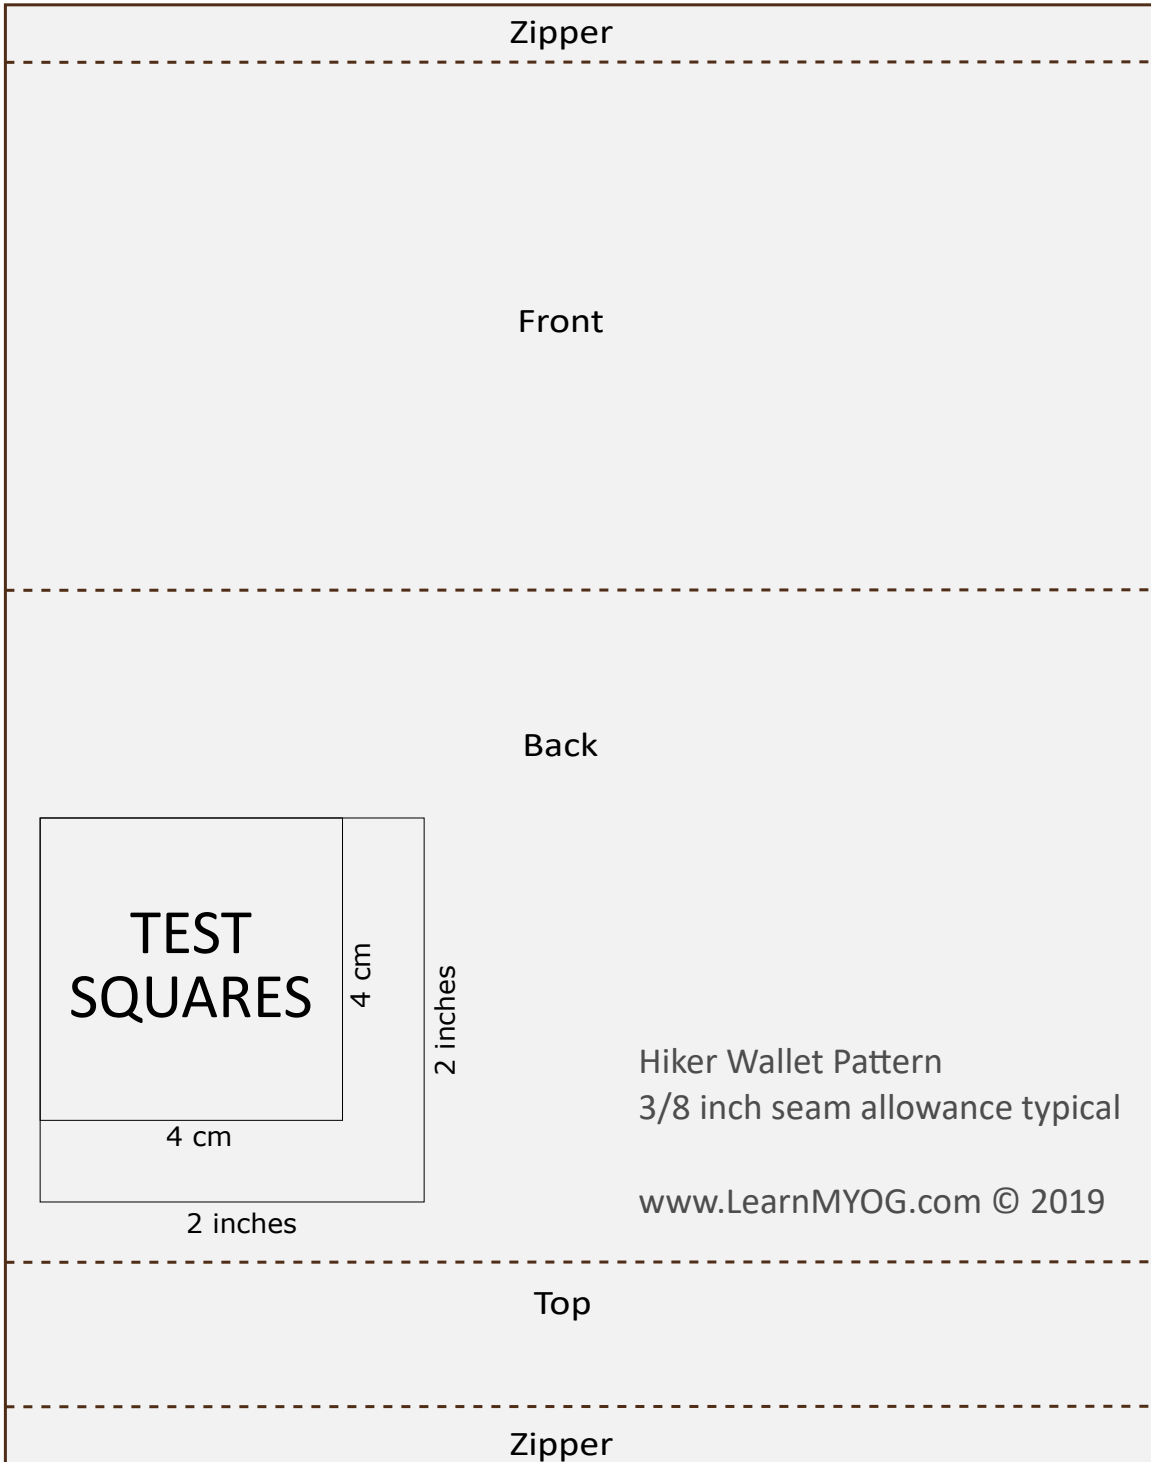

For long pattern pieces, this symbol indicates you must lengthen the piece before cutting. Lengthen the pattern from the point of arrow by the amount indicated.

Joining Line

Large pattern pieces must be taped together after they have been traced on paper. Red colored lines indicate matched edges. Small triangles indicated alignment points.
